Insights from
Magic Quadrant.

Magic Quadrant

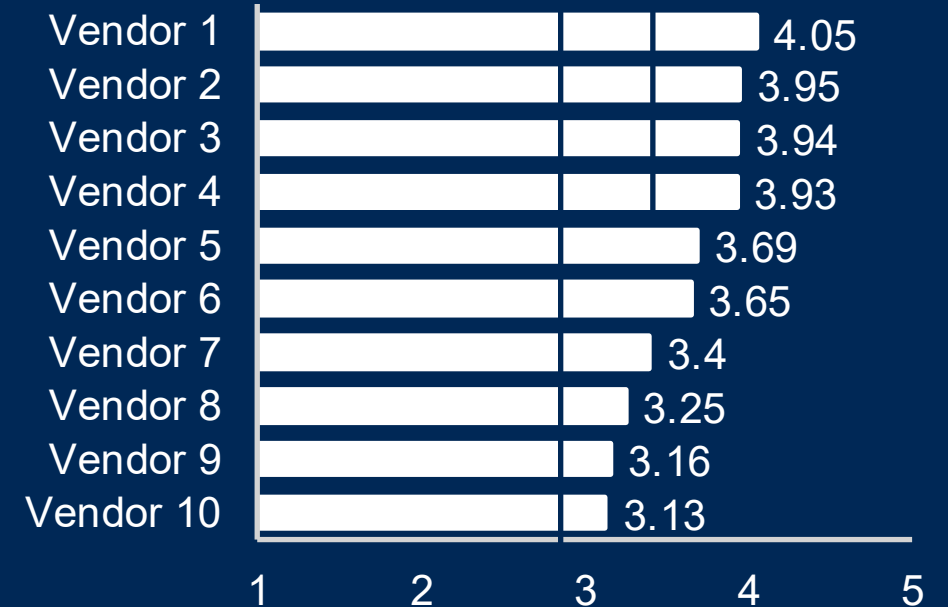

(Overall assessment)

vs.

Critical Capabilities

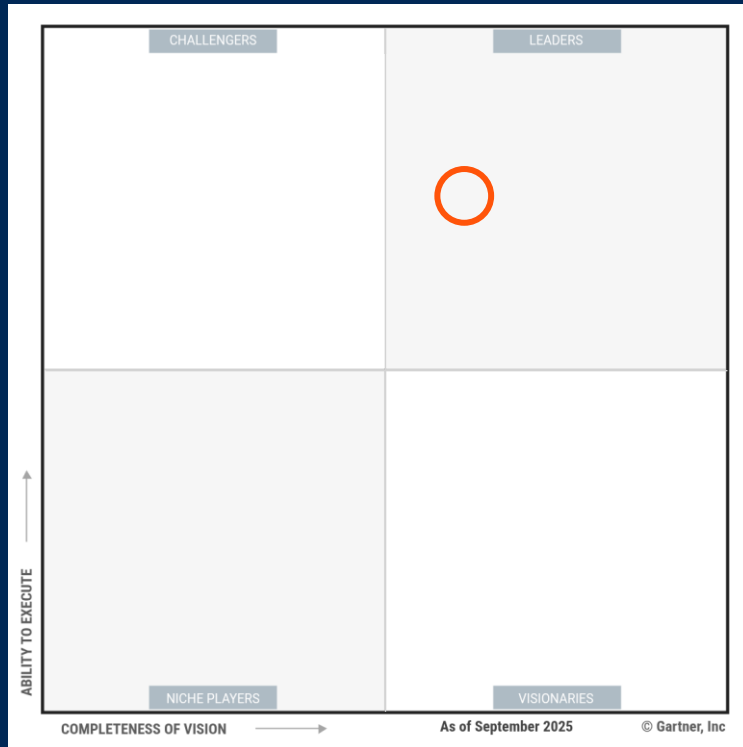

(Technical assessment)

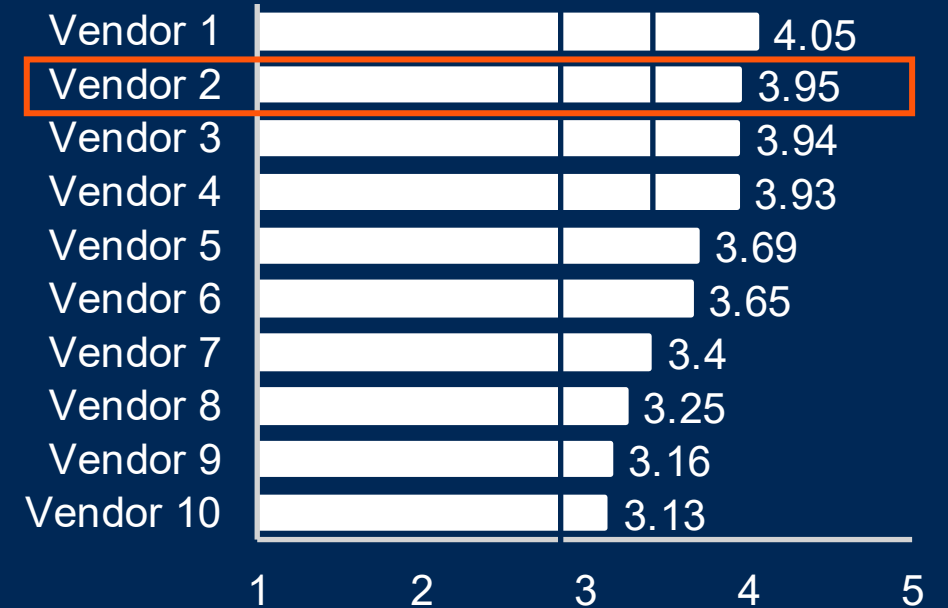

Magic Quadrants offer visual snapshots, measure Completeness of Vision and Ability to Execute and are business-/strategy-oriented in nature.

Critical Capabilities complement analyses from the Magic Quadrant to offer deeper insight into the products and provide use-case-based scoring and are technical in nature.

Magic Quadrant

Critical Capabilities

Maximize your vendor selection by using both.

MQs and CCs cover different areas and topics.
But when used **together**, they provide the **best**
context you need to make a decision.

Agenda

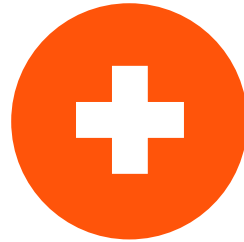

What are the differences between
Magic Quadrant (MQ)
and Critical Capabilities (CC)?

Insights from
Critical Capabilities.

Insights from
Magic Quadrant.

Inclusion Criteria for the MQ

\$60M revenue
annually
or
1,100+ active
customers

Must have global presence
(not more than 80% in one region)

Must be SaaS (but can offer on-premises)

Must own intellectual property
for access management products

Cross-vertical usage

MQ Vendor Ranking Criteria

Criteria weighting: ● High ● Medium ● Low

Ability to Execute:

- Product/service
- Sales execution/pricing
- Customer experience
- Overall viability
- Marketing execution
- Market responsiveness and track record
- Operations

Completeness of Vision:

- Offering (product) strategy
- Innovation
- Market understanding
- Marketing strategy
- Business model
- Geographic strategy
- Vertical/industry strategy
- Sales strategy

Primary Focus — MQ

- Journey-time orchestration
- Phishing-resistance multifactor authentication
- Support for standard identity protocols
- Support for account takeover (ATO) prevention
- Protections against common MFA attacks
- Delegated administration
- Identity data, profile and life cycle management
- Threat detection and response (TDR) functions
- Support for passwordless authentication methods

Magic Quadrant for Access Management

Added vendors:

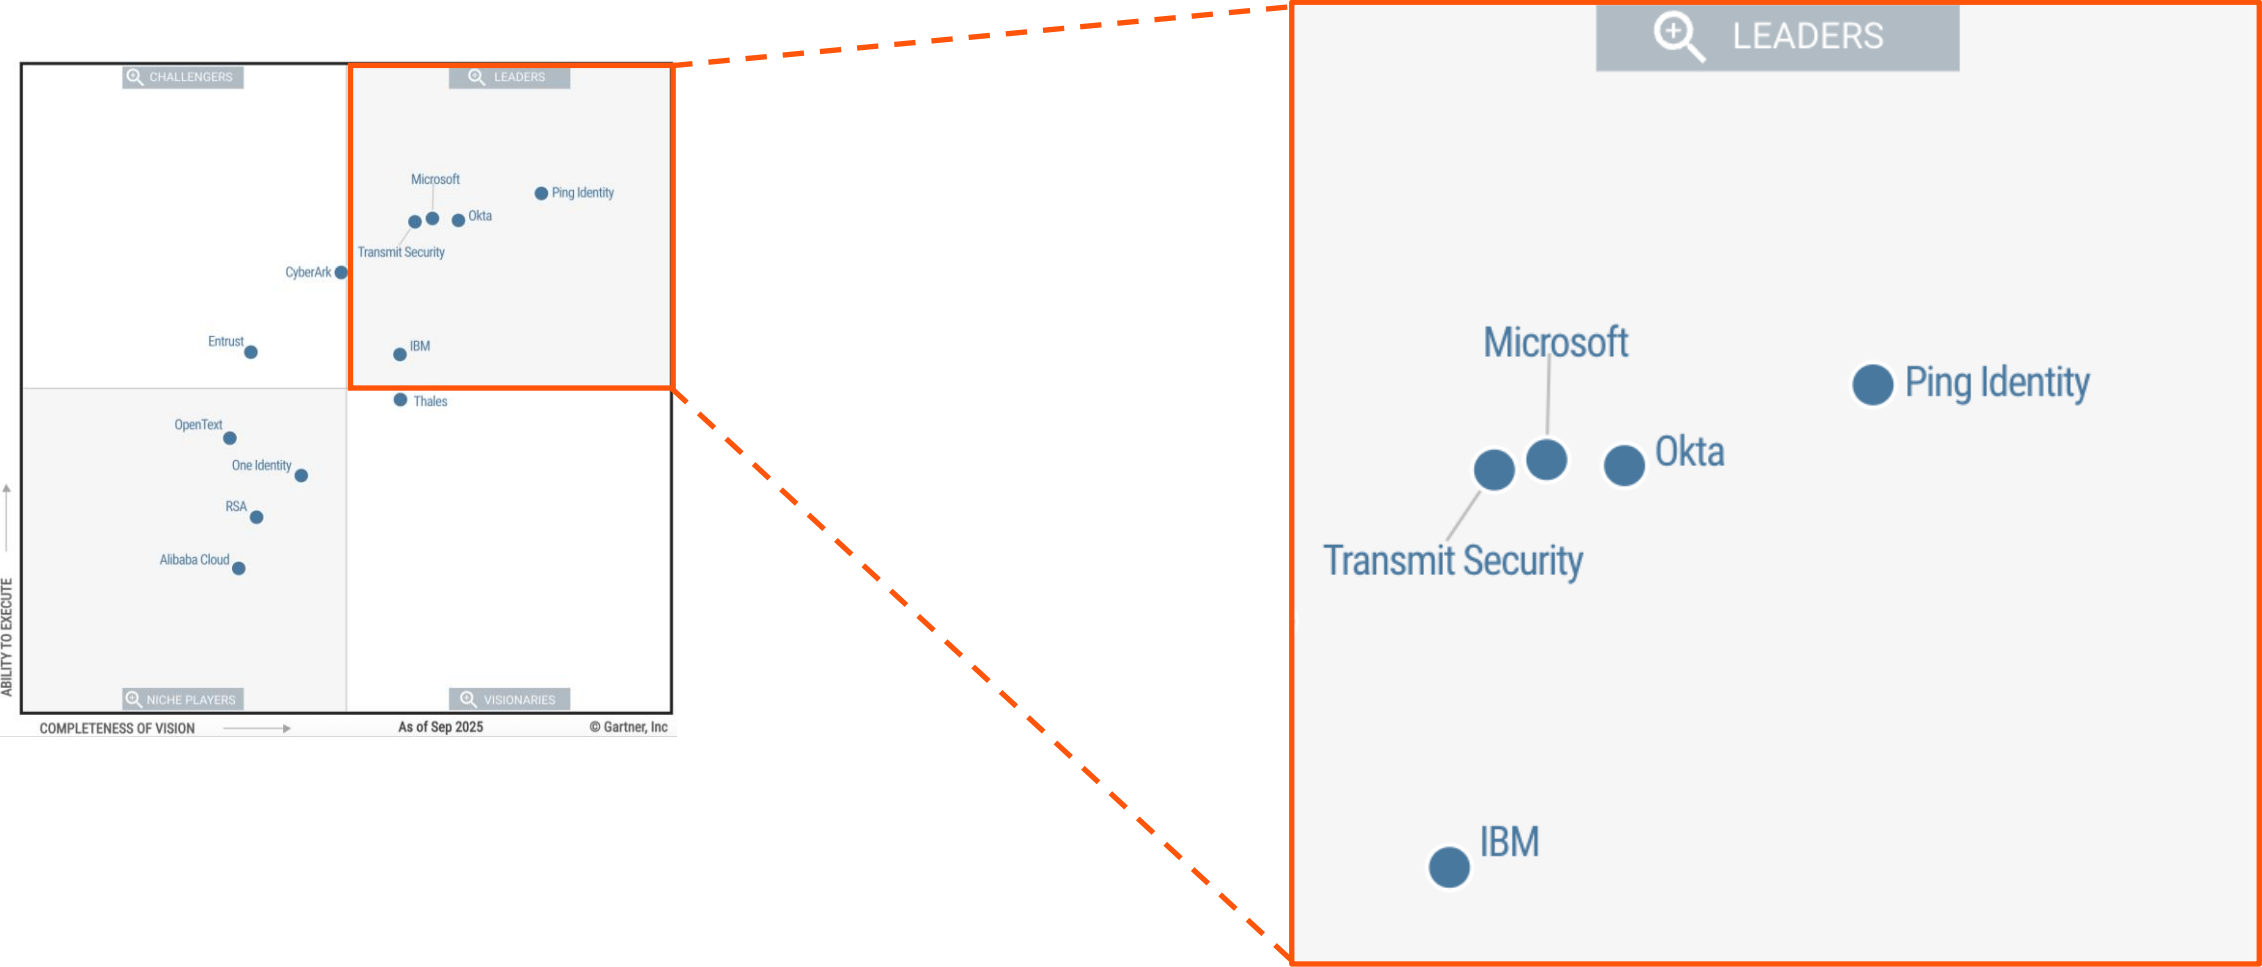

- Alibaba Cloud
- Transmit Security

Dropped vendors:

- None

MQ: Behind the Curtain

- **84%** of vendors did **not** complete their 2025 roadmap (only two vendors completed 100%).
- **84%** experienced **customer-facing outages** in 2025 (only two vendors had none):
 - 128 total outages; totaling 3,520 mins (58.67 hours).
- **60%** offer **99.95%** standard availability or greater (five vendors only offer **99.5%** or greater in 2025).
- **60%** offer the **same orchestration capabilities** for user constituencies, i.e., workforce, customers, partners, etc. (five vendors do not offer this).

Use the Magic Quadrant for Access Management to choose the vendor that best fits **your business requirements and use cases.**

Product Evaluation Criteria

- 1 Identity data, profile, life cycle mgmt.
- 2 Authentication & ID verification
- 3 Access control
- 4 SSO session management
- 5 Partner management & delegated admin
- 6 Orchestration & extensibility
- 7 Portable & decentralized identity
- 8 SSO session management features
- 9 API access control
- 10 Services security
- 11 Services resilience
- 12 Machine access management

Product Evaluation Criteria

Evaluated for Both Workforce and Customer

- 1 Identity data, profile, life cycle mgmt.
- 2 Authentication & ID verification
- 3 Access control
- 4 SSO session management
- 5 Partner management & delegated admin
- 6 Orchestration & extensibility
- 7 Portable & decentralized identity
- 8 SSO session management features
- 9 API access control
- 10 Services security
- 11 Services resilience
- 12 Machine access management

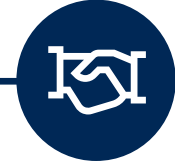

5 Critical Capabilities Use Cases

Workforce access
management

Customer access
management

Partner access
management

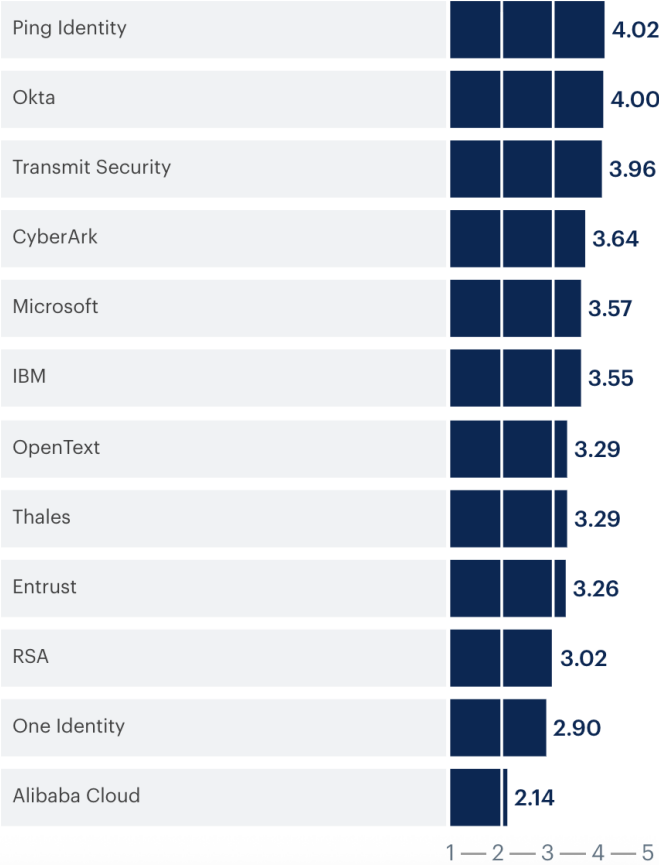

Application
development

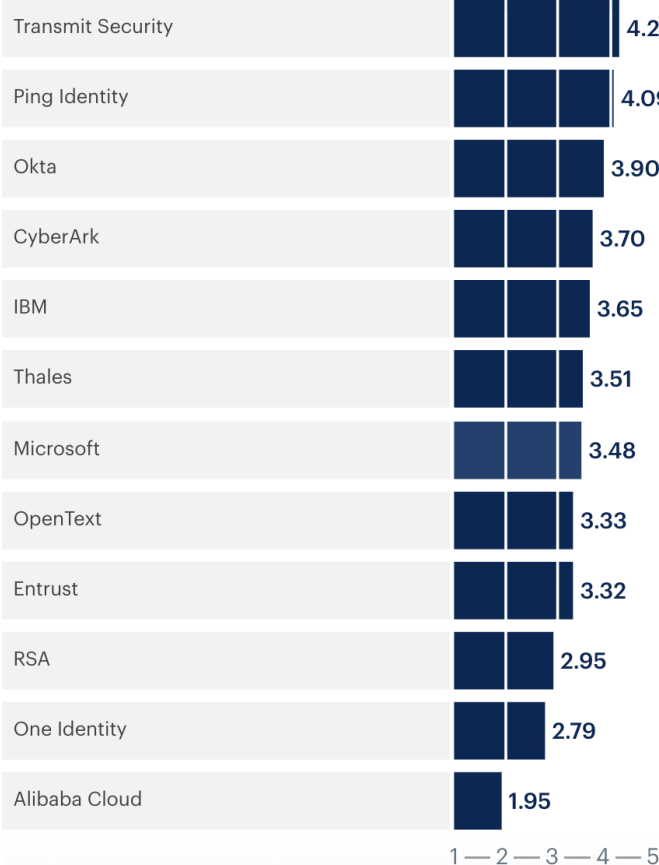

Machine access
management

Critical Capabilities for Access Management

1. Workforce use case

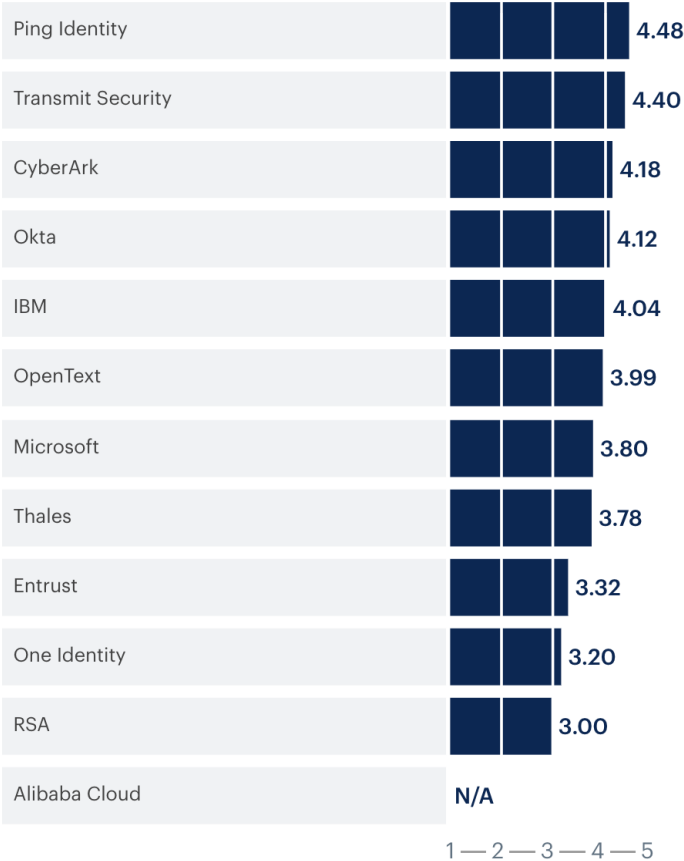

2. Customer use case

Critical Capabilities: Behind the Curtain

- **62%** support **editing/removal** of social provider data, anonymization of PII and fine-grained continuous consent.
- **70%** support **user-enabled consent** at the attribute level.
- **85%** support the ability to **globally terminate sessions** via fine-grained control, such as single log out or using CAEP.
- **62%** support the ability to **delegate user registration** to a trusted person, like a parent registering a child account or an attorney registering on behalf of a client.
- **54%** have an **integrated marketplace**.
- **70%** support **humans granting access to machine identities** (to act on their behalf).
- **62%** provide GenAI, agentic AI or other intelligence capabilities.

Recommendations

- ✓ Focus on **your** business requirements and use cases.
- ✓ Prioritize vendor capabilities based on **your** business requirements.
- ✓ Evaluate **user journey orchestration** for customer-facing apps.
- ✓ Use both the **Magic Quadrant** and the **Critical Capabilities** to select a list of vendors based on requirements.
- ✓ Deploy only required features during **initial** implementation.
- ✓ Take advantage of your AM vendor's **built-in** capabilities.
- ✓ Plan for maturity to receive **full value** from your investments.
