Gartner®

According to a Recent Gartner Survey:

65%

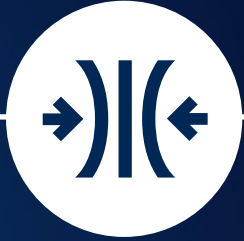

of organizations report using
less than half of the capabilities
of their IGA tooling.

n = 268

Q: What percentage of your tools' capabilities are you currently utilizing for the following IGA capabilities?

Agenda

**Why are
deployments
frequently
in distress?**

**How to prepare
for successful
deployment?**

**What is the
best deployment
structure
and approach?**

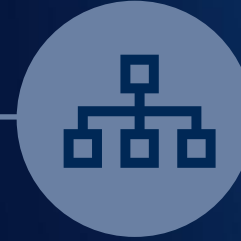

Agenda

**Why are
deployments
frequently
in distress?**

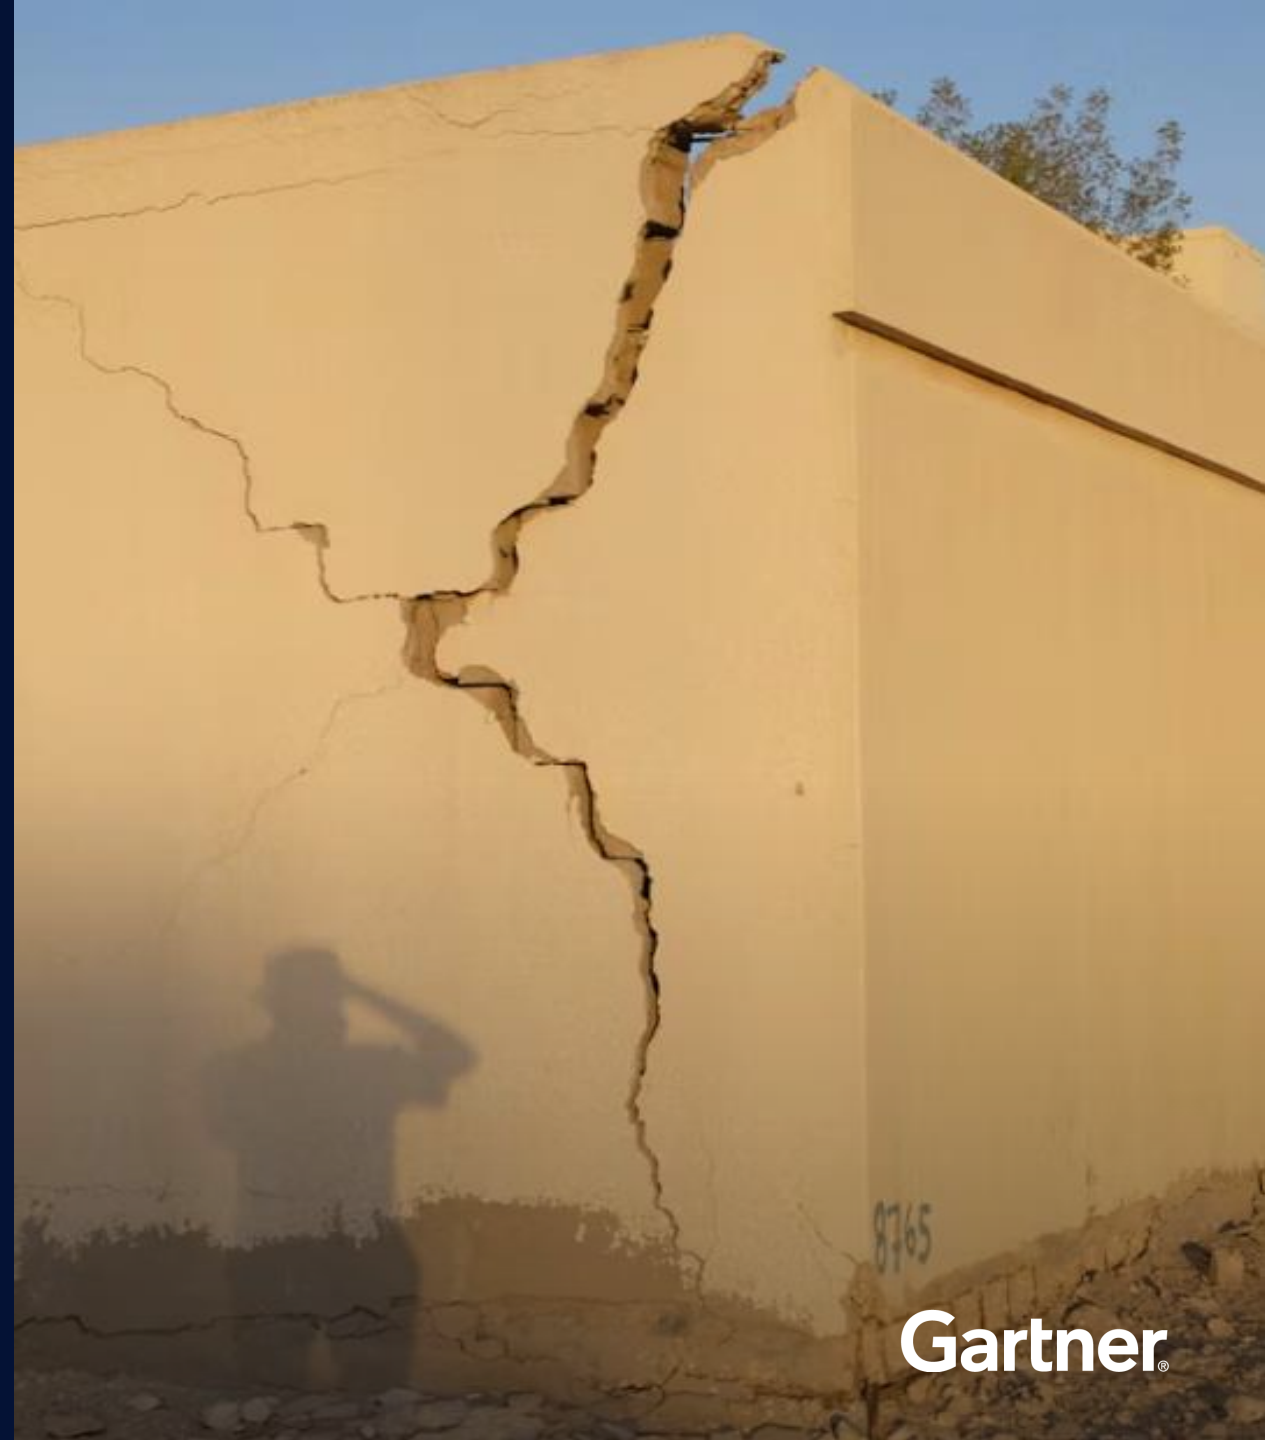

**How to prepare
for successful
deployment?**

**What is the
best deployment
structure
and approach?**

Missed **Foundational** Requirements

- Misunderstood expectations
- Lack of use-case documentation
- Failure to identify all authoritative sources (employee, nonemployees, etc.)
- Inadequate planning beyond initial implementation
- Insufficient stakeholder engagement

Common Deployment Mistakes

- Overscoping initial deployment
- Failure to complete authoritative source data analyses
- Skipping over environmental cleanup efforts
- Incomplete identity attribute schema mapping
- Disregarded efforts to simplify and reduce complexity

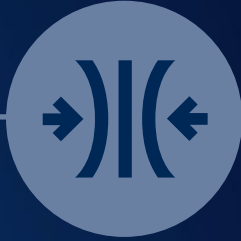

Key Issue Take-Away

Common deployment **mistakes:**

- Overscoping **initial** deployment
- Lack of **communication**
- Shortage of **stakeholder** engagement
- Failure to perform **data analyses**
- Insufficient **identity data mapping**

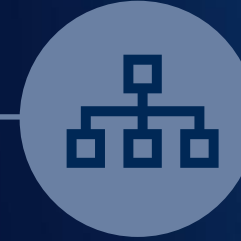

Agenda

**Why are
deployments
frequently
in distress?**

**How to prepare
for successful
deployment?**

**What is the
best deployment
structure
and approach?**

Build Your IGA Foundation First

- Set expectations
- Complete use-case documentation
- Identify authoritative sources
- Establish postdeployment plans
- Update and engage stakeholders continuously

Build a foundation **first**. Then, start laying the bricks.

Plan, Prepare and Execute

- Limit initial deployment
- Communicate the plan with stakeholders
- Complete identity data cleanup efforts
- Validate when environment is ready
- Finalize use-case documentation
- Establish a short-/long-term deployment plan

Successful IGA deployments require significant **planning**, extensive **preparation** and perfect **execution**.

Key Issue Take-Away

Build your foundation **first**.
Then, **plan, prepare** and **execute**:

- **Prioritize** business requirements
- Set **expectations** with stakeholders
- Extract, analyze and clean up **authoritative** source data

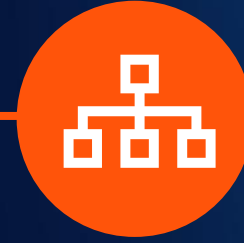

Agenda

**Why are
deployments
frequently
in distress?**

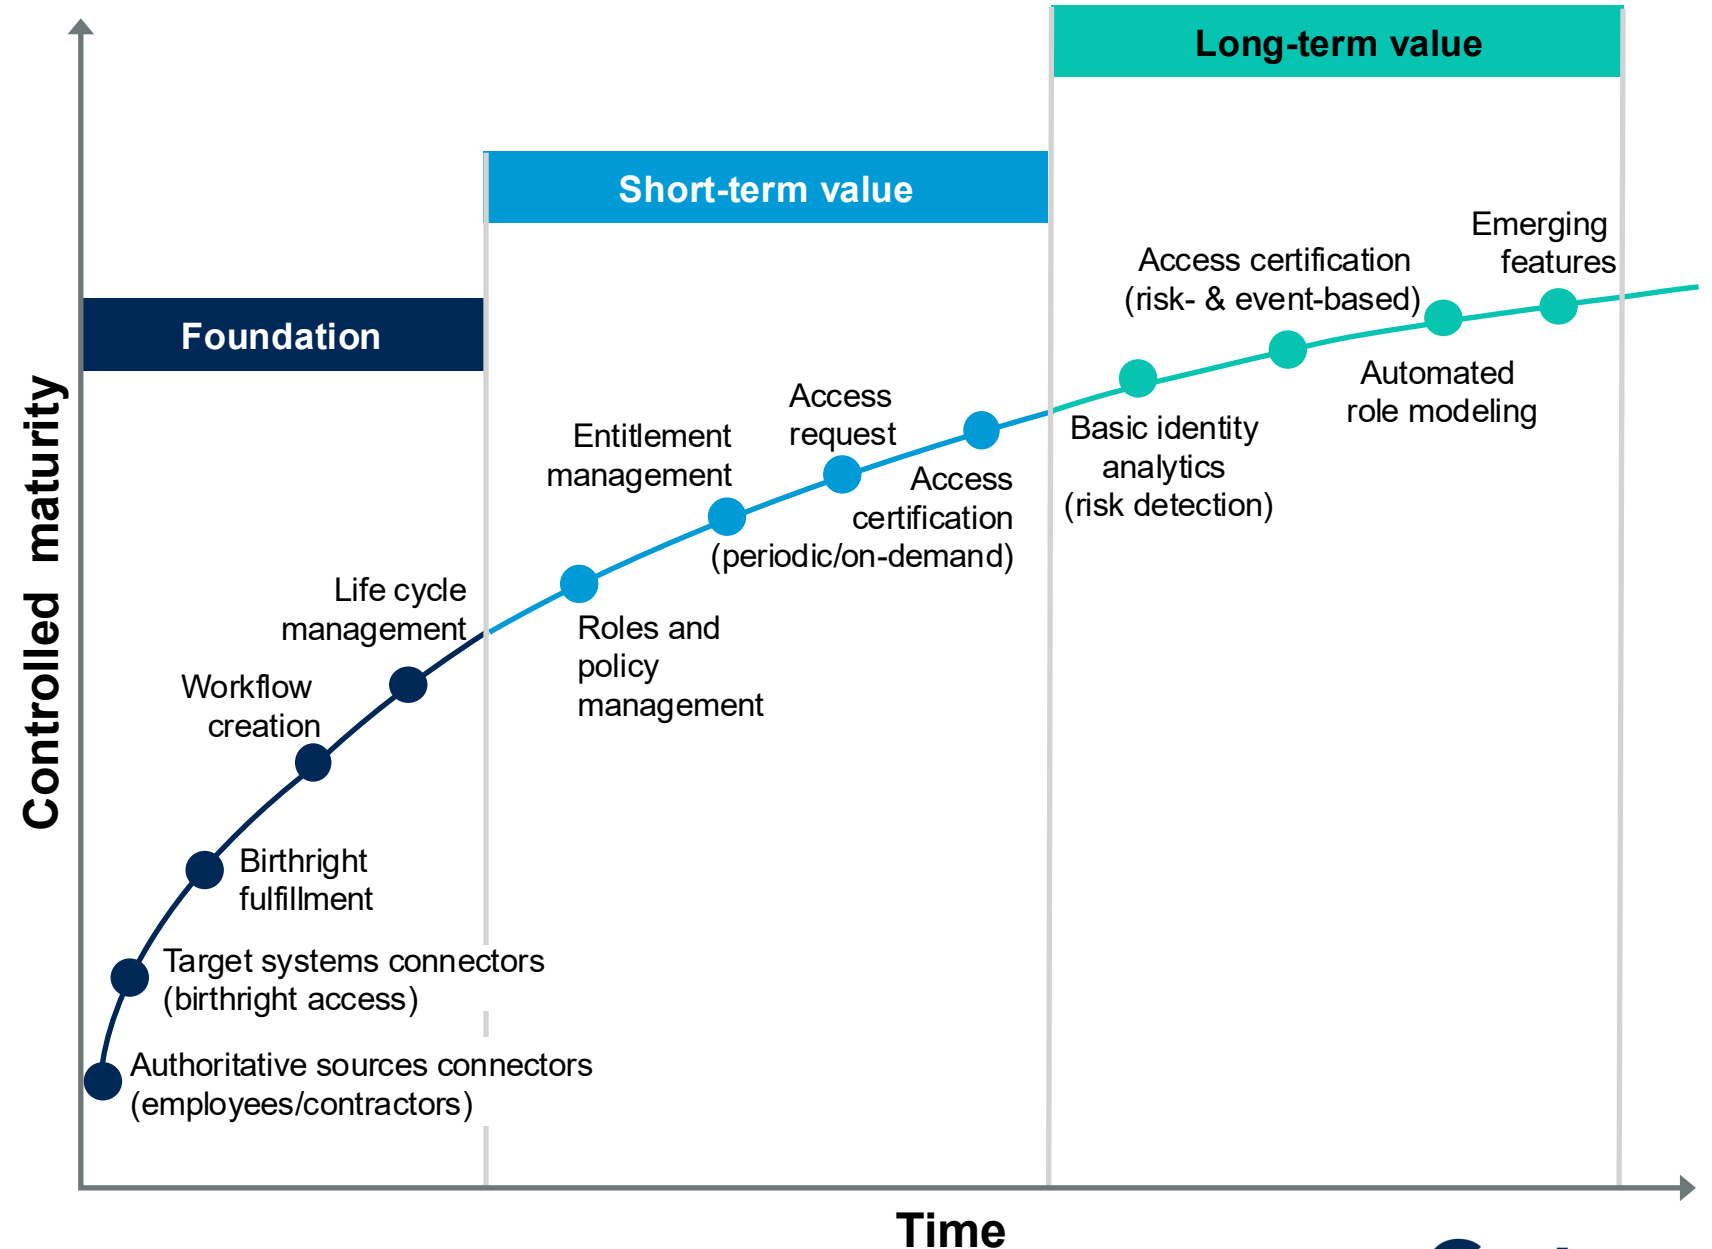

**How to prepare
for successful
deployment?**

**What is the
best deployment
structure
and approach?**

**Build your
foundation
first.**

**Then, plan,
prepare and
execute for
ongoing
maturity.**

Key Issue Take-Away

Successful deployments require:

- Ongoing **stakeholder** engagement
- **Prioritizing** business requirements
- Limiting the **initial** scope
- Building a **foundation** first; then, planning **short-** and **long-term** rollouts

Recommendations for Successful IGA Deployment

- ✓ Deploy **only** required features during the initial phase.
- ✓ Adopt **agile** approaches.
- ✓ Deliver **small** wins, no **big bangs!**
- ✓ **Include** project management team members.
- ✓ **Reduce** authoritative sources complexity.
- ✓ Obtain a formal signoff agreement from **all** key stakeholders.
- ✓ Resolve data quality issues **prior** to deployment.

Maximize your organization's identity-first posture.

Action Plan for IAM Leaders

Monday morning:

- *Gather* existing requirements, *identify* system targets and *start documenting* use cases with attributes.
- *Engage* stakeholders, *identify* business drivers, and *gather* governance and compliance requirements.
- *Start creating* an IGA program vision.

Next 30 days:

- *Evaluate* your complexity and *prioritize* goals.
- *Challenge* the feasibility of time frames critically.
- *Communicate* vision and ongoing value to senior leaders.

Next 90 days:

- *Establish* checkpoints along the way.
- *Use* Agile methodologies to *accelerate* high-value items and *deliver* continuously.
- *Split* deployments into build and run.
